BENEFITS OF BUYING A NEW HOME

AVERAGE ANNUAL HOUSEHOLD ENERGY SPEND

Every Elan home is built for modern living and unlike older properties won't require lots of costly repairs and renovations. Buying a new home means you won't have to put up with the previous owners' décor and depending on the build stage when you purchase, you'll be able to personalise the finish of your property.

All of our new homes enjoy a host of energy efficient measures which not only make them kind to the environment, but means they are potentially more economical to run than older properties.

In fact, research conducted by the NHBC and Zero Carbon Hub, suggests that families living in a 4 bedroom home built to 2013 standards are likely to spend £1,050 annually on energy bills – that's £1,410 less than those living in an upgraded Victorian property.
